

THE WAY FORWARD

Volunteer Community Surveyor Program

By UN-Habitat GLTN and the Young Surveyors Network of the International Federation of Surveyors (FIG)

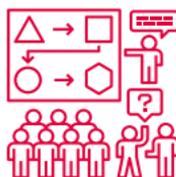

IMPROVED DEPLOYMENTS

Continue in-Country volunteering with Global Land Tool Network (GLTN) while constantly making changes as we learn from past deployments, including longer, more flexible deployments, more support for volunteers, and more streamlined deployment logistics.

WISDOM WORKSHOPS

Regional and local groups will be empowered to run their own Wisdom Workshops with support from the VCSP Team. These workshops are designed to add to a volunteer's toolkit so they're prepared to be a Volunteer Community Surveyor.

E-VOLUNTEERING

A new option to volunteer, the E-volunteering path is to provide opportunities to FIG YSN members in a variety of commissions or skill base. This type of volunteering is also an opportunity for those who cannot spare time off work or away from their family, for example.

PASSING ON KNOWLEDGE

Create a central repository for knowledge, communications, support, and program growth and sustainability. Mix mentoring from FIG's seniority and previous Volunteer Community Surveyors with enthusiasm and skill from FIG's young surveyors.

NEW PARTNERSHIPS

Build on our existing partnership with the GLTN and UN Habitat while developing new relationships with other potential partners that can act as Funding, Technology, Knowledge, and/or Opportunities Partners.

DEFINED VALUES

The VCSP Team will expand the Code of Conduct and will take care in ensuring appropriate matches are made between Volunteer Community Surveyors and Partners who share our Values: Volunteerism, Curiosity, Sustainability, and Respect.
