The Passing of Professor Dr. Volker Böder 05/10/2012

Dr. Michael Sutherland Chair (2011-2014), Commission 4, FIG

It is with great sadness that we recognise the passing on Friday, 31 August 2012 of Professor Dr. Volker Böder of Hafencity University Hamburg (HCU), Germany and, until his passing, vice-chair of Commission 4, and chair of Working Group 4.3 Multi-Sensor Systems for Hydrographic Applications. Ironically, Volker's demise was due to a shipping accident that occurred on the River Rhine close to Basel (on the German-Swiss border).

Volker was a very active member of Commission 4 that was working on a publication related to the development of technical guidelines for sensor integration (best practices). Although he had a busy life outside of FIG and Commission 4, he was very supportive of the Commission's work and objectives. I found him always pleasant, soft spoken, respectful and dependable. He shall be very much missed as a colleague and friend.

How to Use QPS' Qimera to Validate Processed Point Files

QPS Qimera processing software has been released earlier this year. To demonstrate the capabilities, this video shows how to load processed point files into a Qimera Project. It explains what processed point files are; how to specify the coordinate system of the project and the source files; how to create a Dynamic Surface from processed point files and

Stop concentrating on the atmosphere and try looking at the whole picture. There is a thermal gradient within our planet. How is it affected?
