

## **Session 1: General Considerations**

van der Molen: **Innovation**  
Enemark: **Paradigm**  
Stanfield: **Constraints**

## **Session 2: Data Acquisition**

Claypool: **Collaboration**  
Bartels: **GPS data enhancement**  
Gustafson: **Turn-key solutions**

## **Session 3: Data Application**

Money:	<b>Visions take time</b>
Rabley:	<b>Business processes</b>
Hacker:	<b>Data integration</b>

## **Session 4: Data**

Bacharach:	<b>Interface</b>
Stevens:	<b>Infrastructure</b>
Lemmen:	<b>Core data model</b>
Padilla:	<b>Institutional revolution</b>

## **Session 5: Business**

Lopez:	<b>Spatial data hub</b>
Le Roux:	<b>Business process fusion</b>

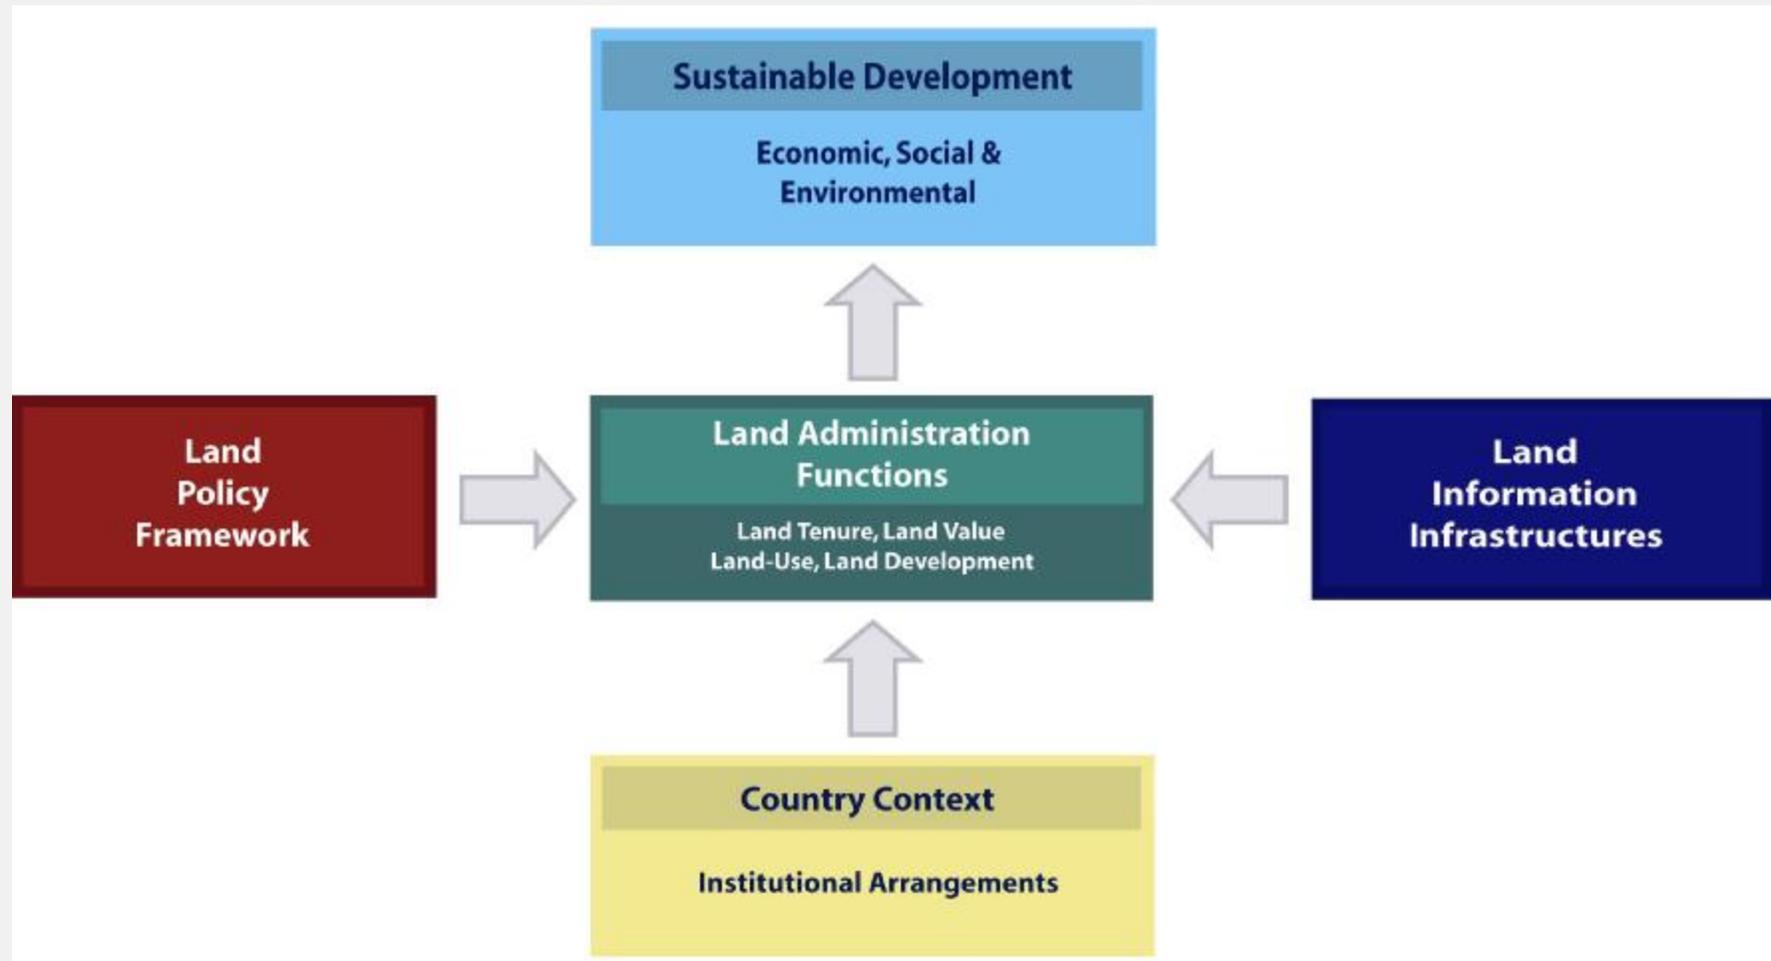

## **Session 6: Solutions**

Mulholland:	<b>Centralized database</b>
Burgess:	<b>Mining the cloud</b>
Daugherty:	<b>Spatially enabled IS</b>

## Conclusions

- many challenges to land administration organisations
- need for innovative approaches to land tenure and technology
- alignment at both strategic and operational level
- impacts on organisation
- this symposium looks into the future

# The Land Management Paradigm

# Digital Photographing Deeds

| Daniel Steudl  
| Technology fo

# Hand Copying of Deeds

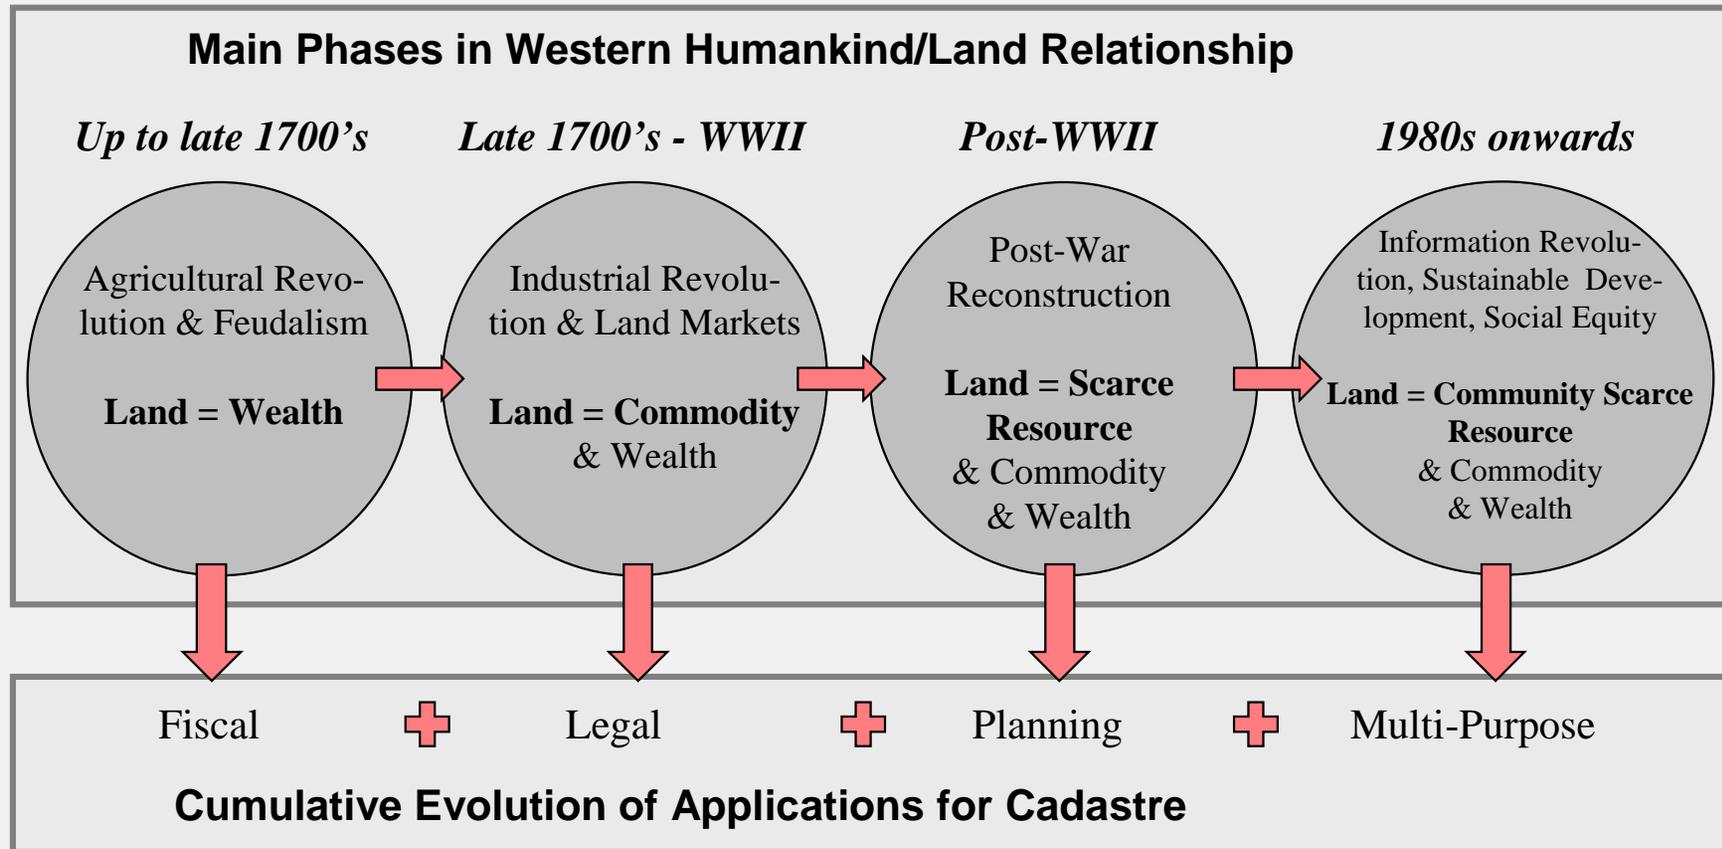

# Conclusions

- Engineering accuracy is required for cadastral applications
- Definition of cadastre will expand to include modeling of real world infrastructure
- 3D is required
- Federated information management is the only way to join multiple disciplines

# Conclusion

- Current proposal is under development, workshops, reviews, etc
- More attention to process side (in addition to data side)
- Not only the model itself is important, but the fact that there is consensus (also important role of industry)

# Evolution of Cadastres

[Ting and Williamson, 1998]

# Discussion topics

- Does high-tech match with low-cost approach? How?
- Do LA managers show enough strategic awareness?
- IT capabilities and scalability for evolutionary approaches
- Context-driven innovation – does innovation mean the same in developed and developing countries?
- Decentralization and community involvement versus centralized databases
- Minimizing cost of training and application of IT
- Minimize duplication – maximize cooperation
