

TAKARNET24 project, towards e-Land Administration in Hungary

Gyula IVÁN-Tamás DOROSZLAI-Gábor SZABÓ-Zoltán WENINGER
Institute of Geodesy, Cartography and Remote Sensing, Budapest, HUNGARY
Open Symposium on „Progressing Towards U-Cadastre”
15th October 2009., Kuala Lumpur, Malaysia

Republic of Hungary

- Area: 93 000 sqkm
- Population: 10 million
- Economy: (GDP based)
 - Services (62%)
 - Industry (27 %)
 - Agriculture (5%)
- GDP: 9 800 Euro/Capita
- Cadastre&Land Registry:
 - No. Of Parcels: 7,6 million
 - No. Of Properties: 10 million

The Unified Hungarian Land Registry

- In Unified Land Registry Cadastral Mapping and Registration of Lands (Properties) belongs to the same organization: Land Office Network
- Unified Hungarian Land Registry has been operating since 1972
- Unified Hungarian Land Registry is a Title Registry, all registered rights are guaranteed by the State

Structure of LA in Hungary

Department of Lands and Geoinformation at Ministry of Agriculture and Rural Development
Overall supervision of LA Sector

19 County Land Offices + Land Office of the Capital

- County level supervision of District Land Offices
- Second level authority in LA cases
- Planning and coordination

District Land Offices (121)

- Daily updating of unified Land Registry
- Cadastral mapping
- Land valuation, land protection, land use
- Data service
- First level authority in LA cases

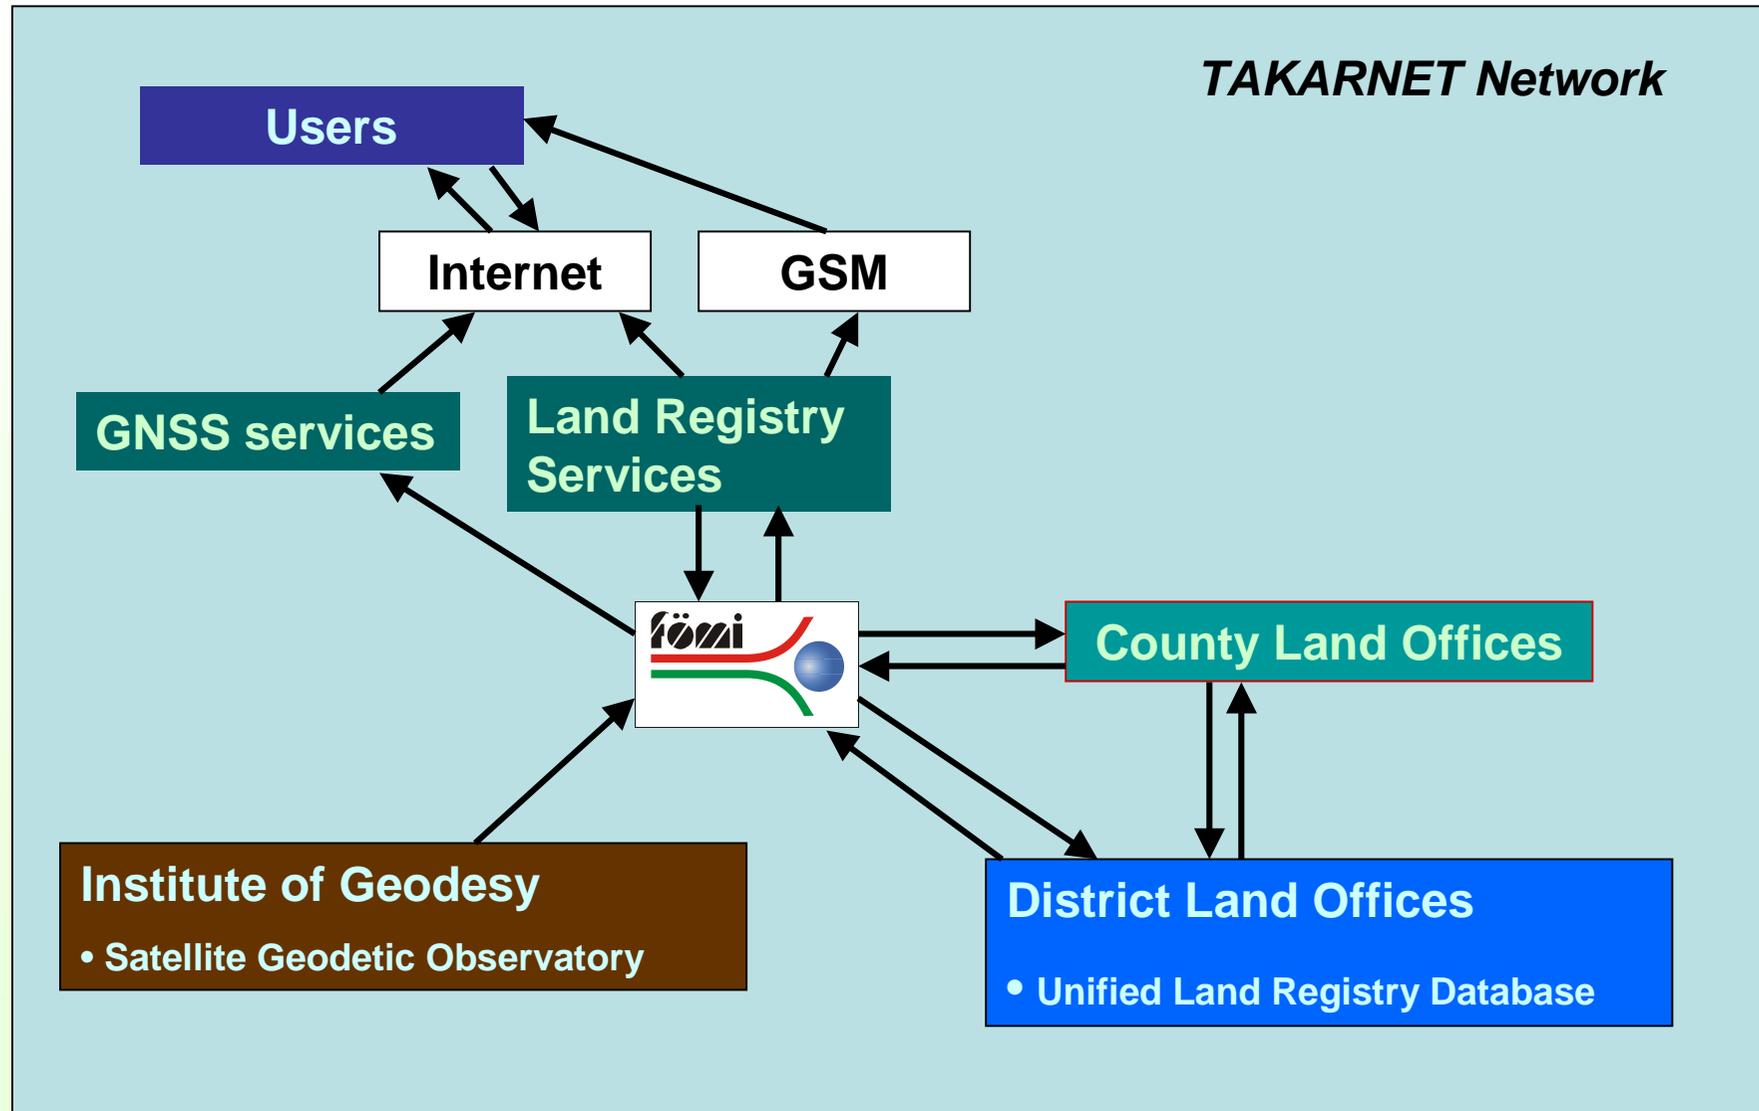

FÖMI 

- R+D activities
- Support of Land Offices
- Operation of TAKARNET
- Topographic mapping
- Remote Sensing activities
- State Boundary Survey
- Quality Management
- Cosmic Geodesy

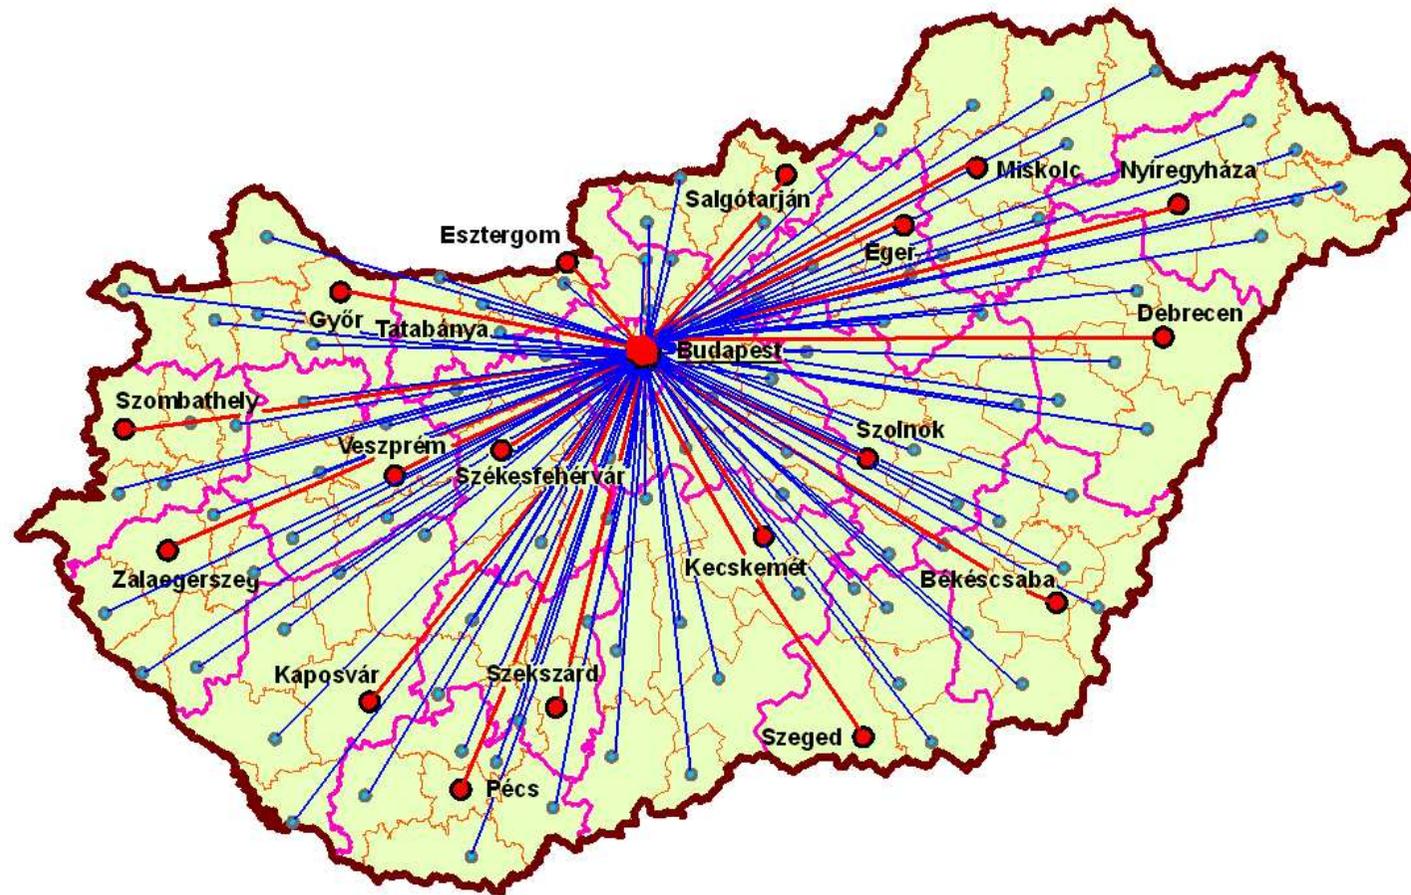

National Cadastral Program

- Huge cadastral mapping projects

IT Infrastructure of LA

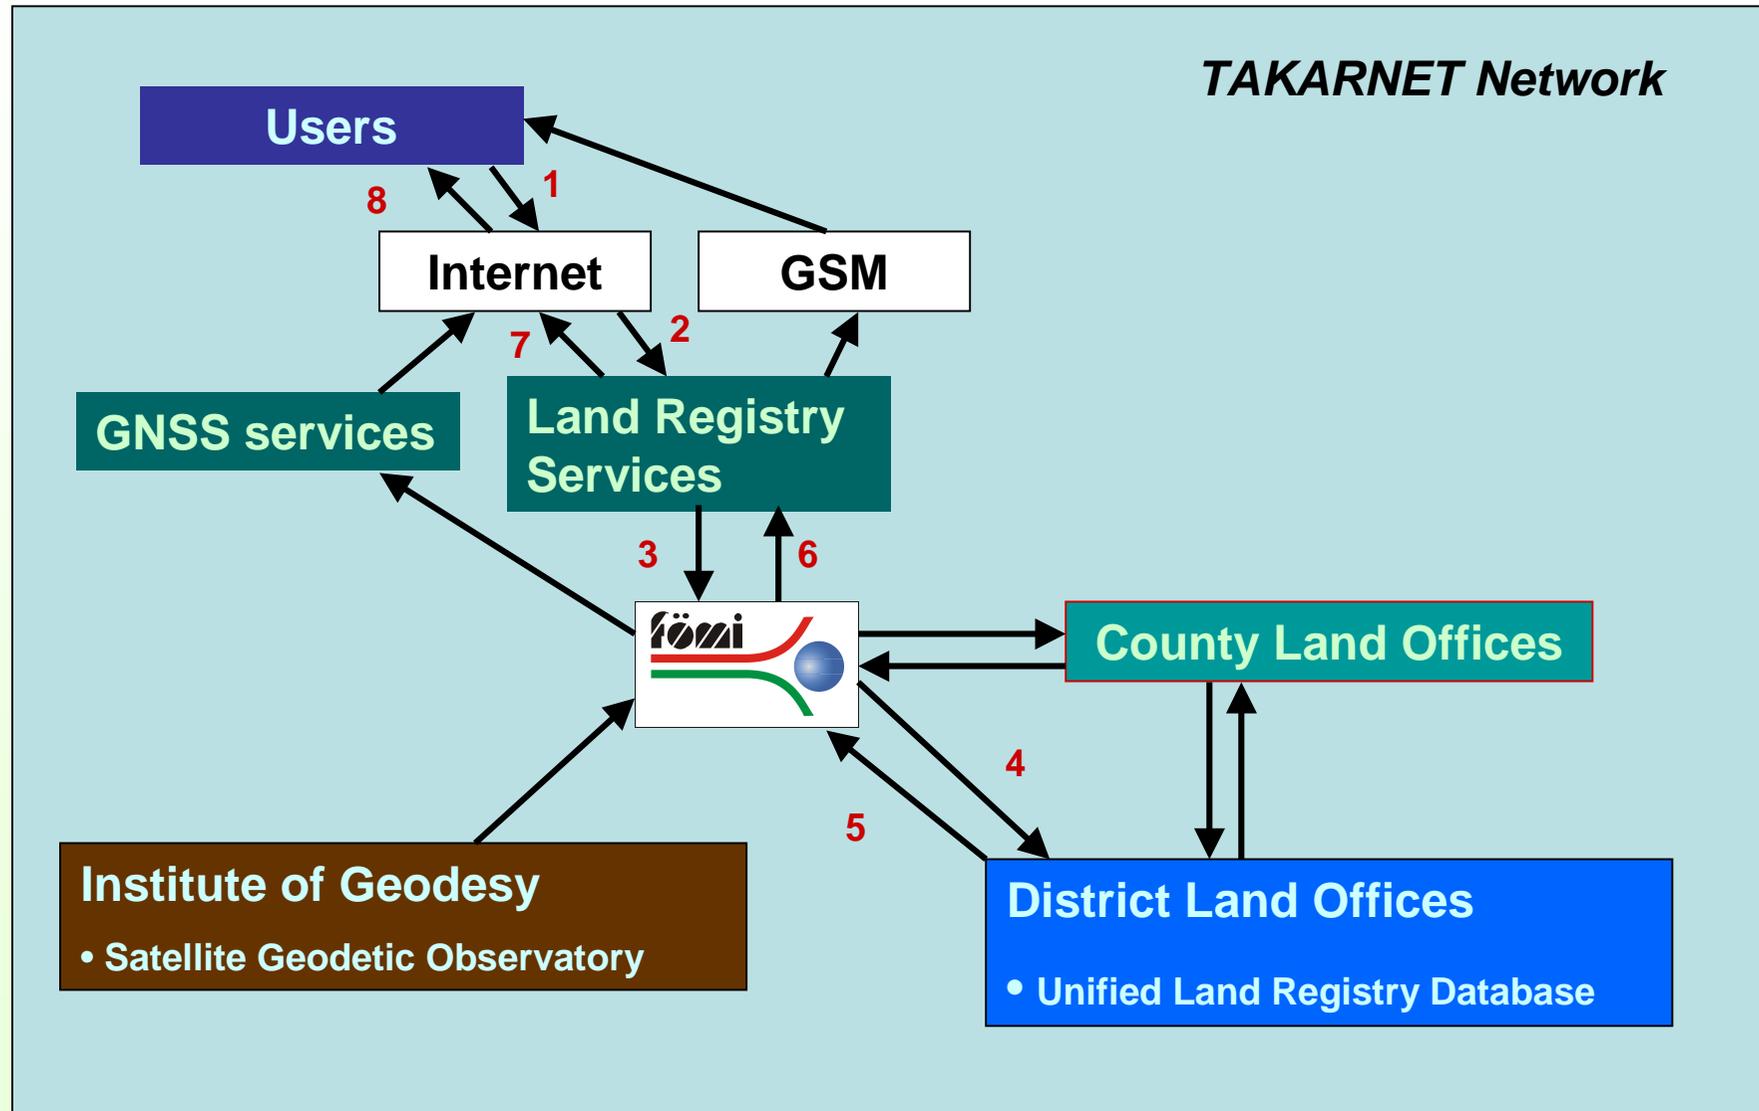

TAKARNET Network

Land Registry Services

- Copy of Land Record & Cadastral Map
 - Searching based on Lot number or Address
 - E-authentic Land Records
- Billing information
- Property change monitoring
 - Automated service on e-mail or sms
- All these services are available only for registered and authorized users (lawyers, banks, surveyors, tax office etc.)
- Authorization is licensed by the Ministry

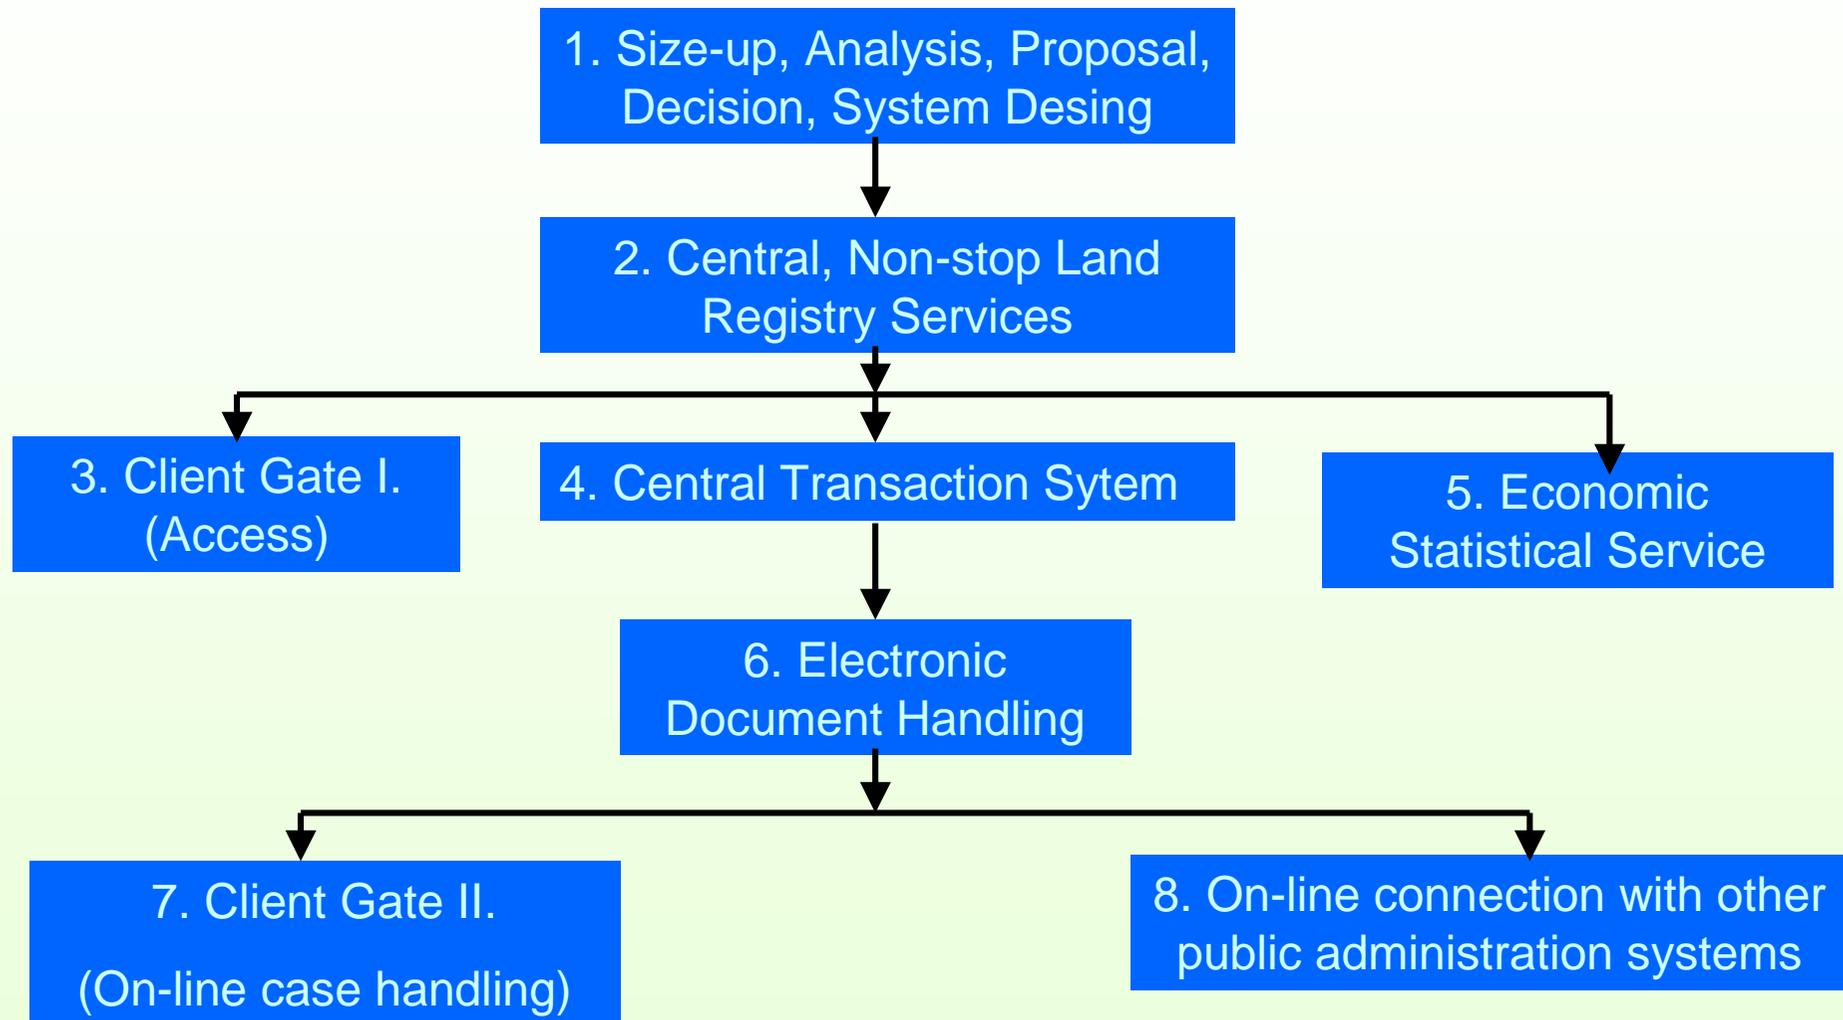

Operating of Services

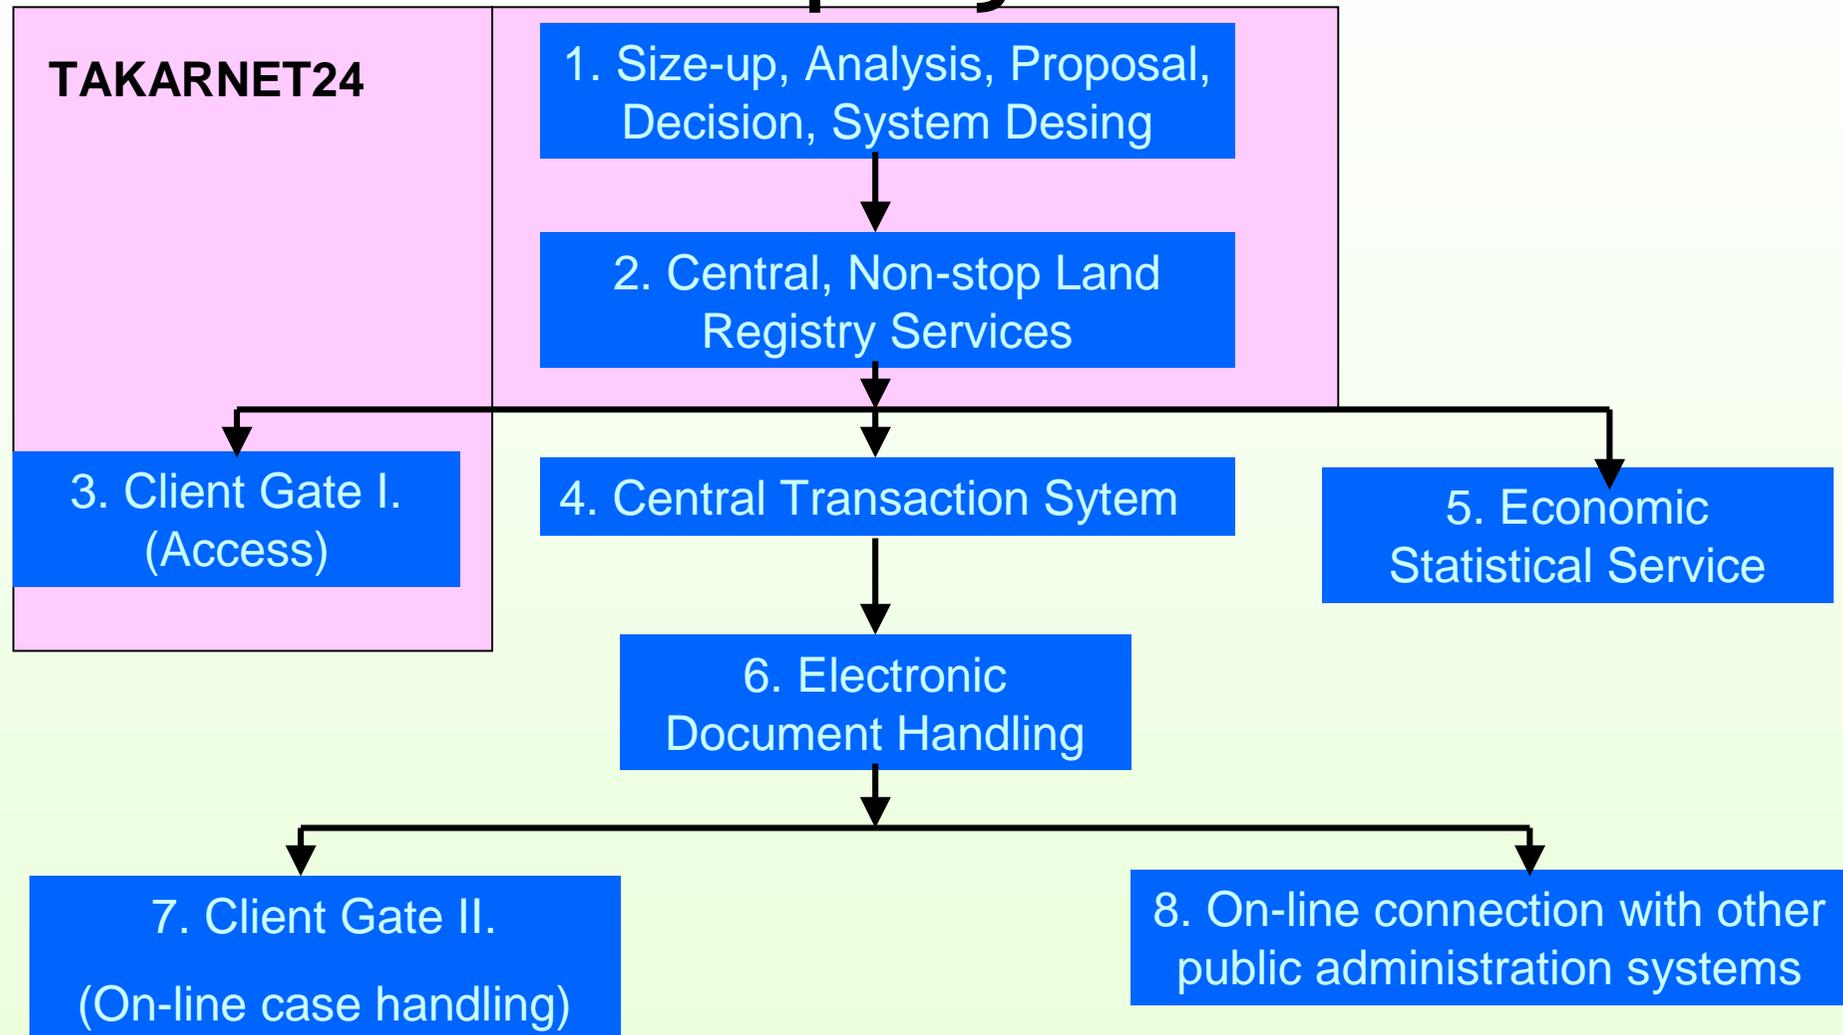

Digital Land Office Concept

- Long-term (5-8 years) strategic concept for implementing a full e-Land Administration in Hungary
- Main goals:
 - Improve land registry services via Internet for wide-range of users
 - Rationalization of resource requirements of operation

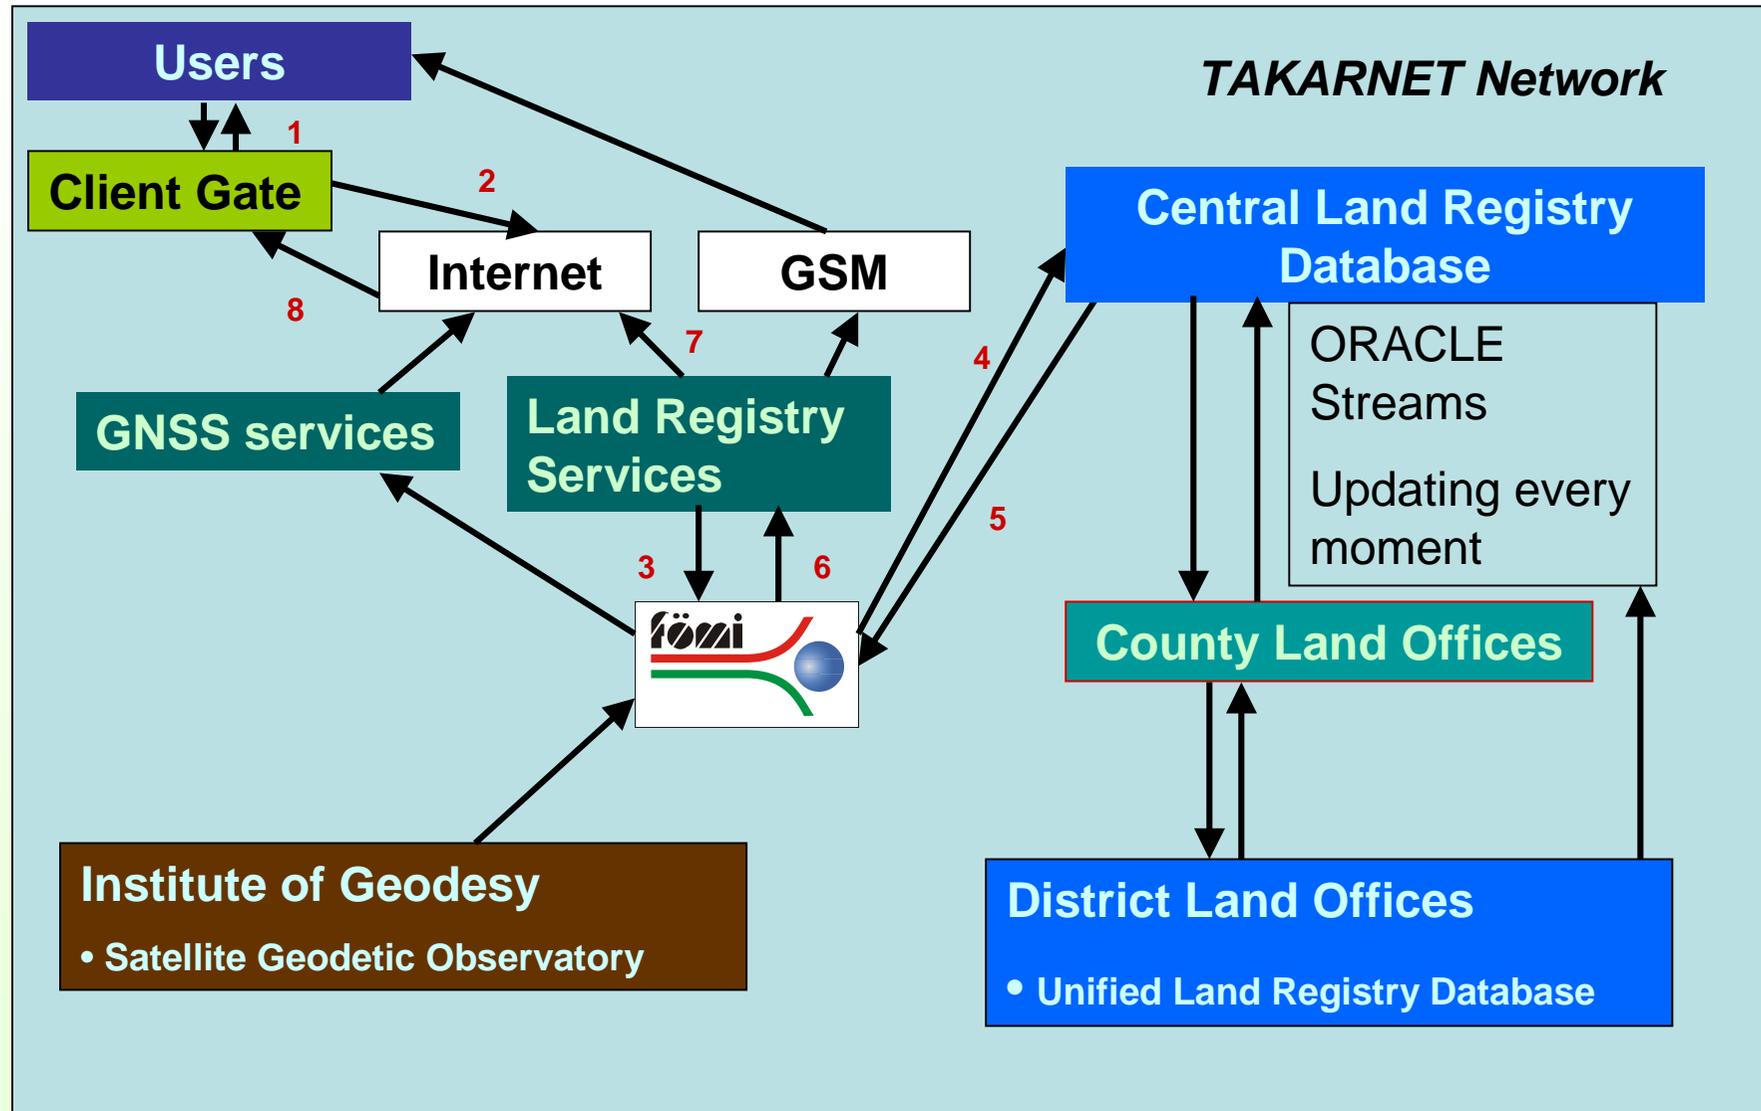

Elements of Digital Land Office Concept

TAKARNET24 project

Changes in Transactions

Core of TAKARNET24-DATR

- DATR is an object-oriented integrated information system for the unified registry (both cadastral maps and legal part)
- DATR has developed by FÖMI en bloc (both professional and informatic side)
- DATR has open APIs for customization of the system
- DATR has interfaces for ORACLE and MySQL RDBMSs
- Customization of the system is very easy to any legal and technical environment
- International version of the system will be published
- DATR data model acts as a country profile for ISO LADM

Important products of the project

- Unified codes countrywide, central registration and maintenance of codes
- Countrywide Map browser based on orthophotos and cadastral maps
- Connection to Client Gate (operated by the Government)
- Connection to Central on-line Payment System
- Property Change monitoring
- Data warehouse functions:
 - Data mining
 - Statistics

eEurope2002 - Impact and Priorities

- Four stage framework for public services:
 1. Posting of information on-line (TAKARNET info)
 2. One-way interaction (digital application sheet dl.)
 3. Two-way interaction (dig. Application sheet download and upload)
 4. Full on-line transaction including delivery and payment (downloadable copies, payment, property monitoring)
- TAKARNET24 project satisfies all stages of framework

Conclusions

- Digital Land Office concept has defines the further development directions of Land Registry Services in Hungary
- Implementation of the firts three steps are going on
- Economic crisis strongly influence the execution of ideas
- TAKARNET24 project will be finished in time, September 2010
- DATR development has shown that the cooperation of land professionals and IT specialists results the best solutions
