HISTORY

Albanian Young Surveyors is a parallel structure which coordinates the work regarding to the program, goals, and any other objectives that protects our interests and assists in the development of young surveyors.

This structure will serve as a bridge between geodesy students, young surveyors and Albanian Association of Geodesy (AAG), private companies, state administration and beyond, so the younger generations who will graduate in this branch will be qualified, recognize technology, have information about the state institutions that need specialist surveyors and be capable in the labor market.

Albanian Young Surveyors was established in 25.11.2010

THE STUCTURE

CHAIRMAN

VICE-CHAIRMAN

SECRETARY

COORDINATOR

COUNCIL

OBJECTIVES

- - ♣ To organize trainings for professional development of the usage of surveying instruments.
 - ♣ To organize trainings in the public and private sectors.
 - ♣ Organization of conferences within and outside the country, to increase cooperation with foreign organizations and structures and to be informed about the latest updates of our profession.

ACHIEVEMENTS
